

THE NEW BEST-IN-CLASS 4-PHASE AIR RECOVERY SYSTEM FROM VENT-A-HOOD®

PROPRIETARY 4-PHASE TECHNOLOGY

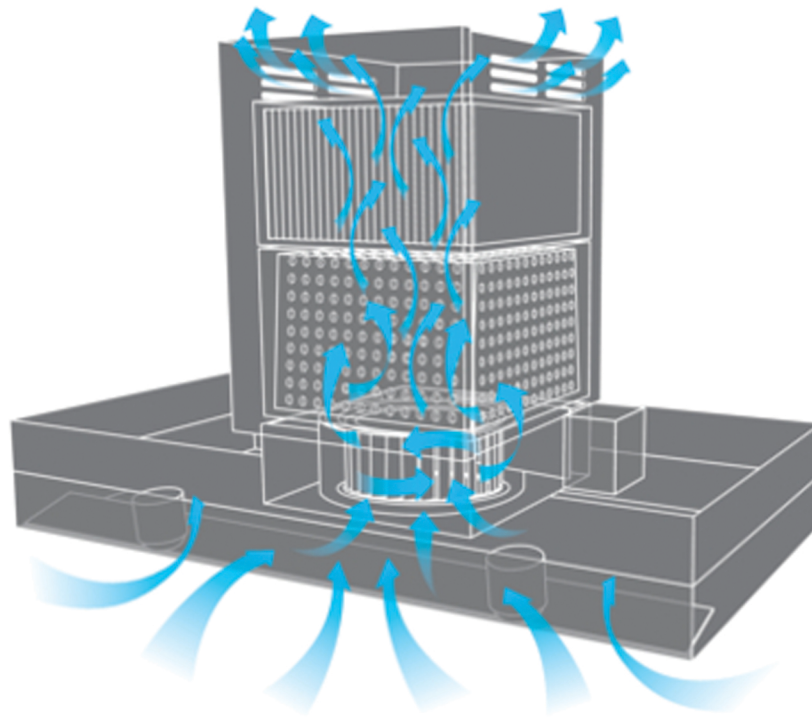

Our patented process systematically eliminates contaminants, cleaning the air and returning it fresh into your kitchen. No more bad odors dominating your kitchen—just delicious home-cooked meals.

IT WORKS!

There are other recirculating products on the market today, but the Vent-A-Hood® ARS system is the only one that *actually* works. The Vent-A-Hood® ARS system cleans and filters indoor pollutants and improves your home's air quality.

GOING WHERE VENTILATION HAS NEVER GONE BEFORE

We created the ARS duct-free hood because some kitchens aren't built to handle a traditional ventilation system. It is the ideal hood for kitchens where venting is not possible.

ACTIVE CANOPY

The canopy is the most important part of any kitchen ventilation system. The ARS' wide open active canopy captures smoke, grease, and odor, so that your home's interior, furnishings, and fabrics stay fresh and last longer.

MULTIPLE OPTIONS

Now available in wall mounted, island, under cabinet, and liner insert options.
